

# A NEW CONCEPT

EU Patent Pending

## FREEDOM GIRTH

by

SCHARF

YOUR SAFE SADDLE, YOUR FREE HORSE

- Externum.
- Externals intercostals.
- Pectoralis ascendens.
- Oblique abdominis externus.

The exclusive design of the Scharf Freedom Girth, was designed such that each part of it, work with a particular muscle of the chest without interfering with the free functioning of other muscle.

Independent accompaniment of the intercostals muscles, right and left.

Independent accompaniment of the pectoral muscles, advancing and receding.

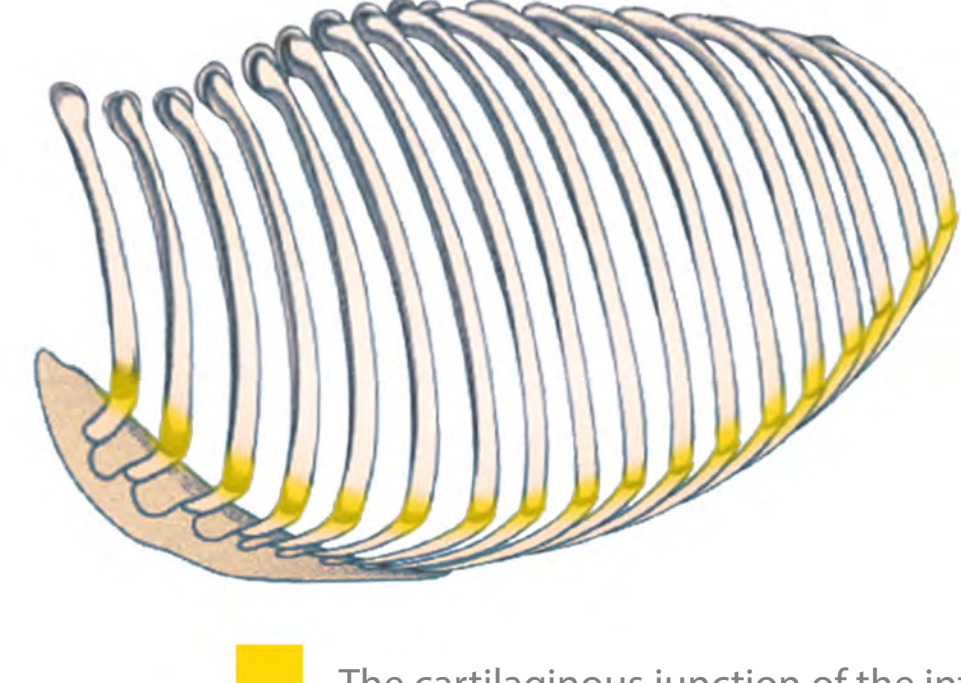

Independent accompaniment of the pectoral muscles, going up and down when the muscles change shape.

### MECHANICAL MOVEMENT PERFORMED BY THE RIB CAGE WHEN THE HORSE BREATHES

The movement that allows elasticity in the cartilaginous junction of the intercostals facilitates the articulation of the rib cage allowing an unforced expansion.

The cartilaginous junction of the intercostals facilitates the articulation.

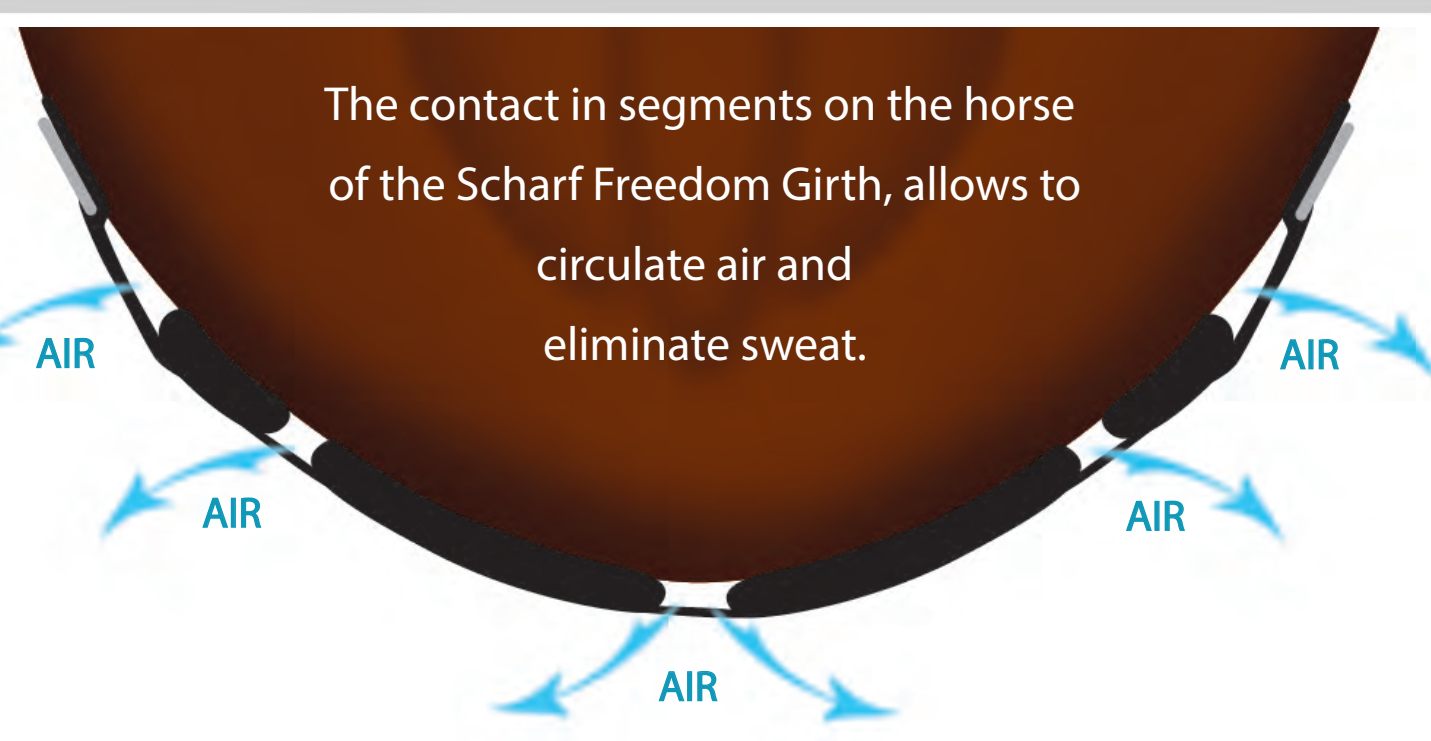

### Maximum air circulation!

### Maximum elimination of sweat!

Sweat marks

The contact in segments on the horse of the Scharf Freedom Girth, allows to circulate air and eliminate sweat.

### STRONG AND RESISTANT

■ Strong synthetic fiber

The Freedom Girth is the only girth with a integral structure within itself of high resistant manufactured with non-deformable polymer fibers. This material works as an internal body without cuts or stitches to make it so strong that it is not possible to break. The strong synthetic fiber (750 ks force resistance in the Dressage and Iceland Horses models and 1500 ks force resistance Jumping, Eventing and Western models) run from one end to another one covered by premium quality skin for its greater elegance and quality, joining and articulating each one of its parts.

This material of last generation, used in extreme force sports (climbing, navy moorings, air sports, etc.) is approved by the European security norms and has a certificate of inspection in force.

### THE SCHARF FREEDOM GIRTH, IS UNIQUE !!

Its revolutionary concept makes it the first girth on the market that works intermuscularly. Its extreme articulation is so evident that it is capable of folding itself so that it is easier to transport it and such that it does not occupy place.

Scharf Freedom Girth is a unique product, manufactured in Europe with high quality materials in accordance with European Community standards.

This product focuses on the quality of life for the horse and its quality will allow you to use it for many years!
